

SIZE GUIDES

On each product page there is a size chart image which is visible if you simply scroll down the image thumbnails to the right of the main image. The size chart is individual to each product, if a size chart isn't shown it is because it is a one size fits all product. The size charts are carefully laid out to show the sizes in both cms and inches depending on your preference and also the size conversions eg EU, UK, USA which is more common for the women's sizing as shown below.

Once you click on the 'Size Guide' image, you will see the sizes clearly shown, in both cms and inches.
For the Women's Sizes, the UK/USA/EU size conversions are clearly shown so you can choose your preference.
Sleeve length is measured from the tip of the shoulder to the wrist.
